

ARC Website Update

October 2023

ARC Strategy Alignment

■ The website refresh project will support the **One Great Region** goal: **Regional services delivered with operational excellence and efficiency.**

■ **The objectives of this site refresh are:**

- To apply ARC's new brand to the website to communicate its One Great Region strategy.
- To more effectively communicate ARC's critical business information and improve the user-experience for site visitors.

The objectives will be accomplished through a strategic, data-driven website design process.

■ **What this refresh is not**, is a complete redesign or re-thinking of the ARC website.

Visits Since Last Redesign

A Glimpse at Traffic in 2023: Jan – September

271,324 Visits 170,671 Visitors

13% of visits started on the homepage

44% of social traffic came from LinkedIn

Strategic Web Design Process

STRATEGY

What does the organization want to get out of the site?

What do our users want to get out of the site?

Deliverables

Site Strategy Document

SCOPE & STRUCTURE

What content and functionality are required to meet our strategy

How will the content and functionality fit together?

Deliverables

Content plan, Functional specs, Site map

SKELETON

What components will enable people to use the site?

How should the page-level information be organized?

Deliverables

Site wireframes

STYLE

What colors, fonts, and image styles will be used to enhance our messages?

What brand standards need to be considered?

Deliverables

Site design comps

PRODUCTION

It all comes together:

Graphic production, Web and CMS development, final copy editing, browser and device testing, and launch.

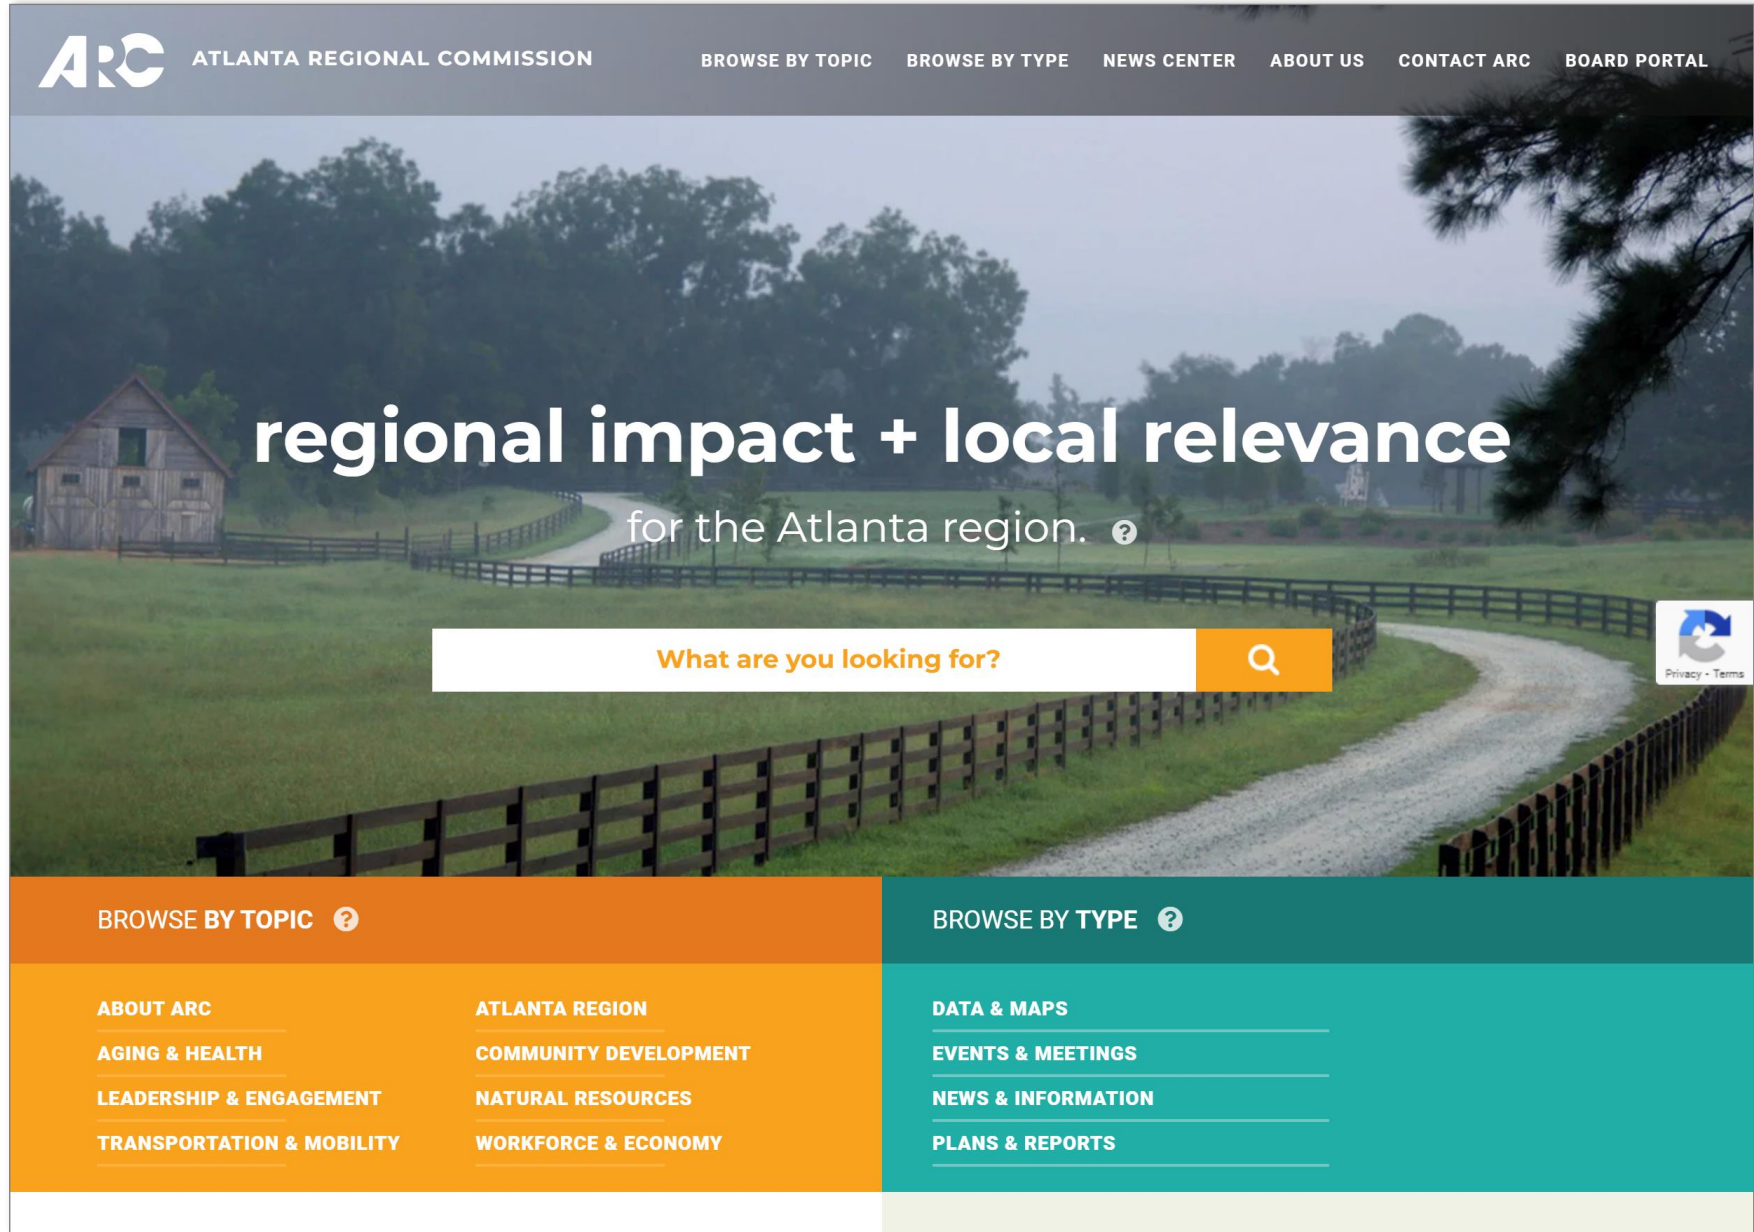

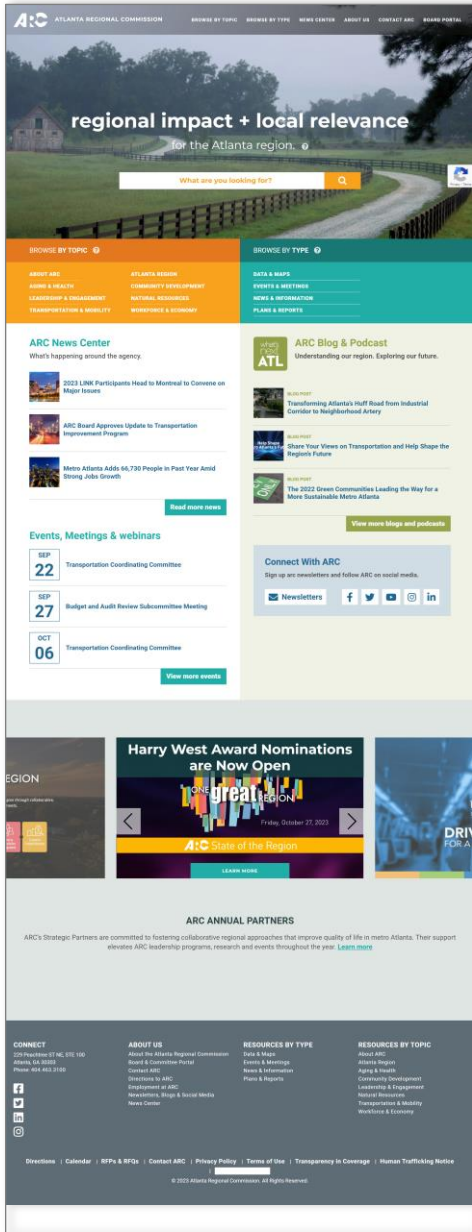

Deliverables

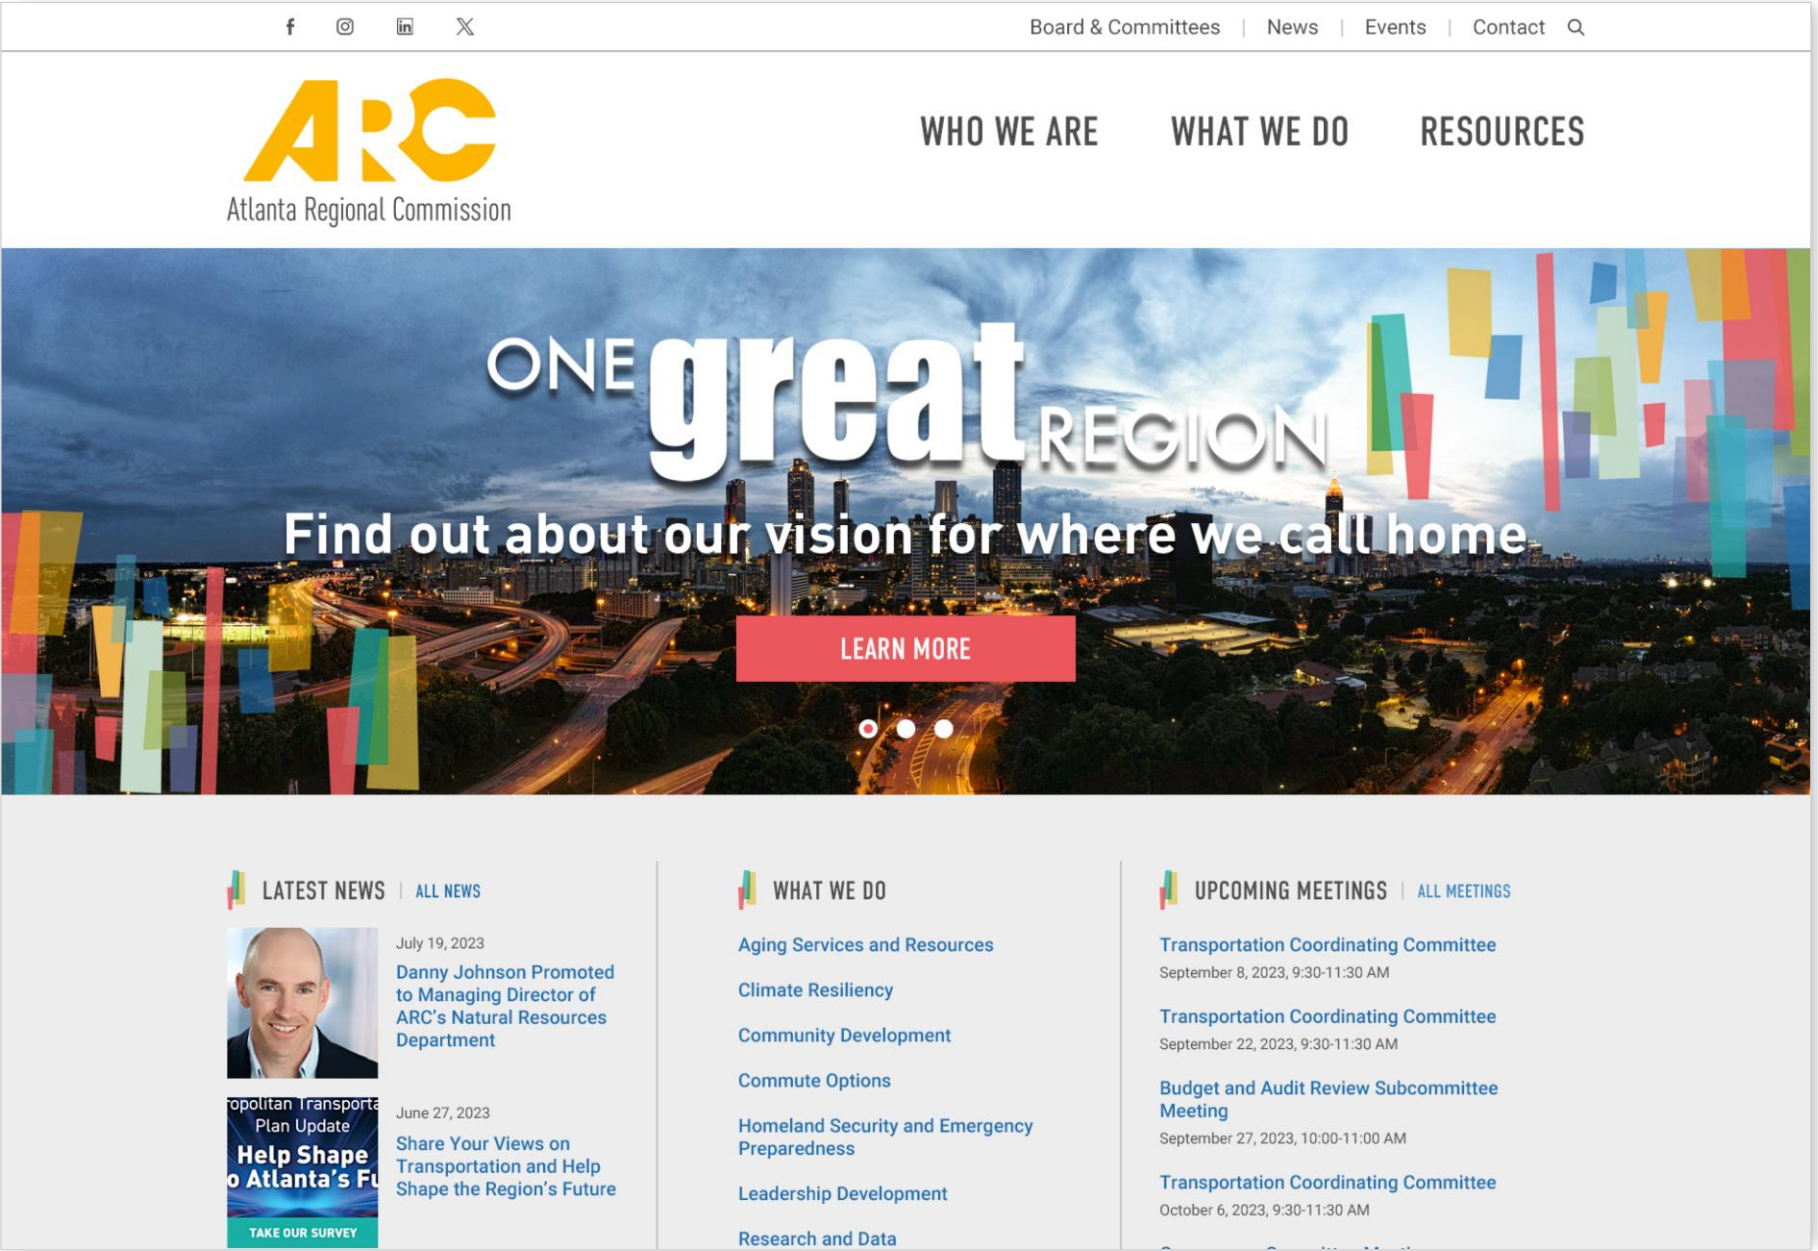

Final, test site files, Admin manual, Admin training session.

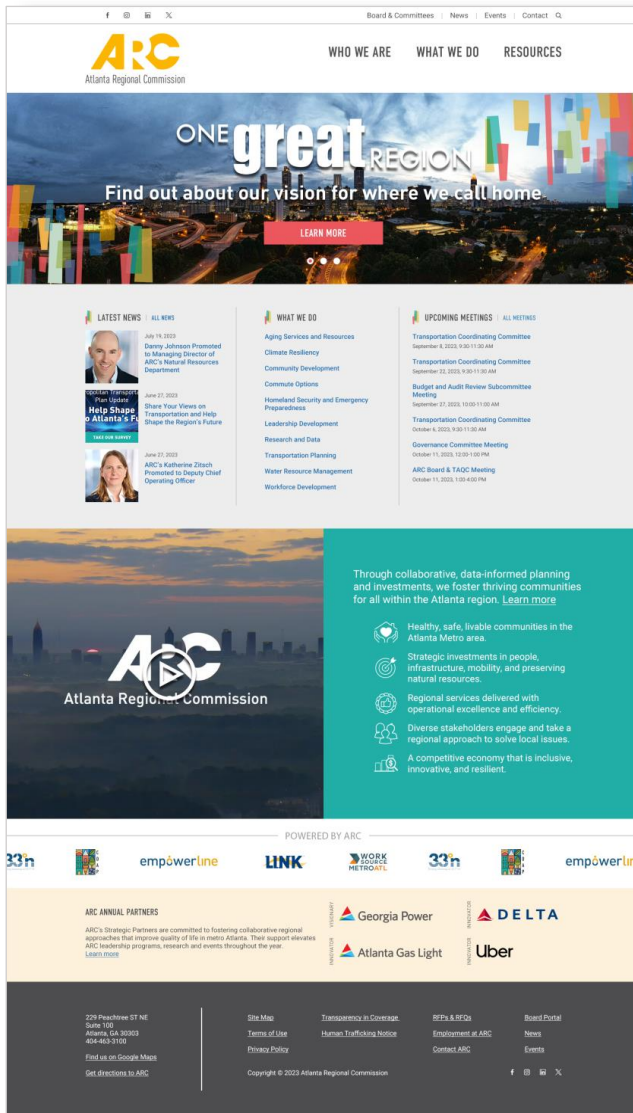

Refresh Priority Areas

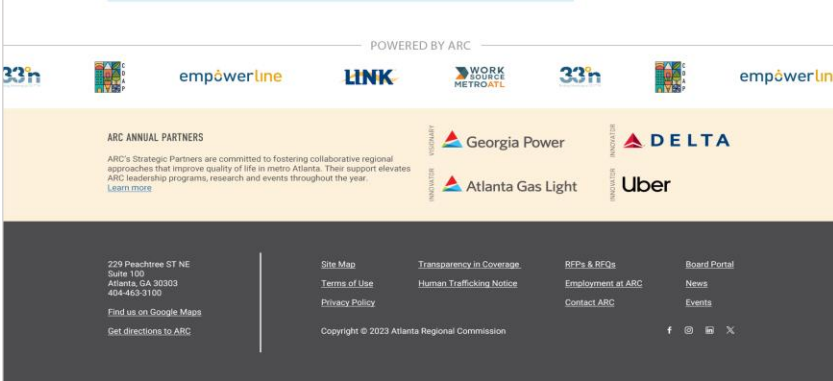

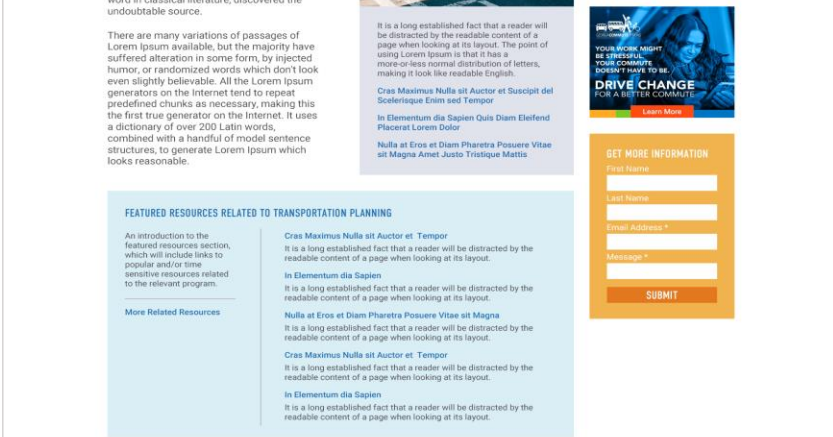

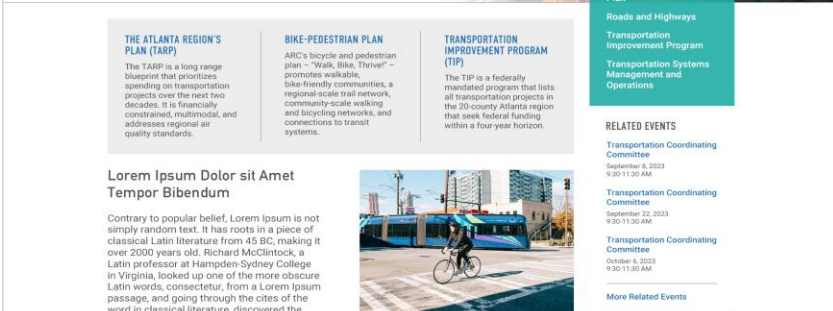

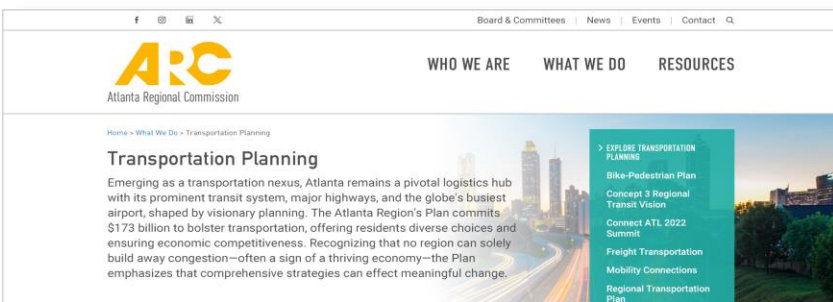

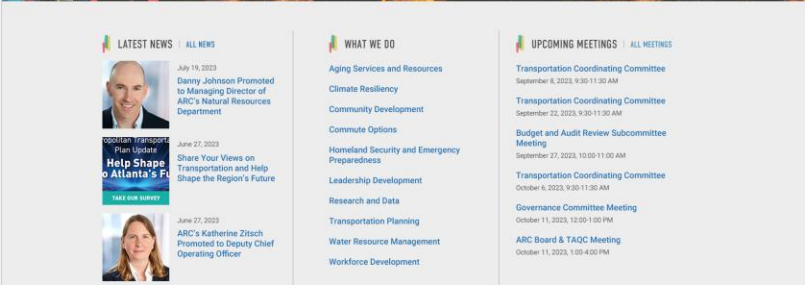

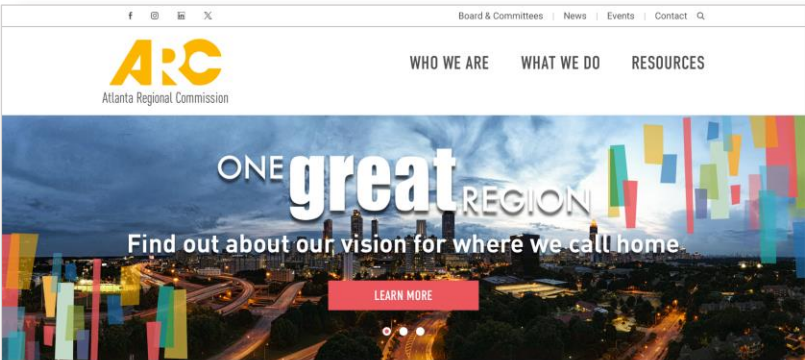

The Creative and Digital Media Department held two focus groups across the agency. Based on this feedback and the external survey results, the following will serve as priority areas for the refresh:

- Develop plan to improve content management and integrity
- Rethink site architecture that is based on the target audience's needs and vernacular
- Improve site search capabilities
- Design new interface and templates for the homepage, topic landing pages, and the main content pages.
- Finalize the design and execution of the document library.
- Improve site accessibility.
- Develop a new site interface and page templates that embody ARC's revamped brand messaging and visual persona.
