Atlanta Regional Commission

Aging & Independence Services

2021 Annual Report, July 1,2020-June 30,2021

empowerline.org (404) 463-3333

We are living longer, and the aging population is growing.

In 2019, around 822,300 people age 60 or older lived in the 10-county region—that's 1 in 7 of us.

By 2050, our 60+ population is expected to grow to 1.8 million, or more than 1 in 4 of the residents of the 10-county region.

Since participating in the program,
I am very active —
I walk two miles every day. I also started eating more vegetables and cook them with no salt. I have found other seasonings to use to make them taste better.

- Client of the diabetes coaching program

Providing services to maximize independence, health & well-being

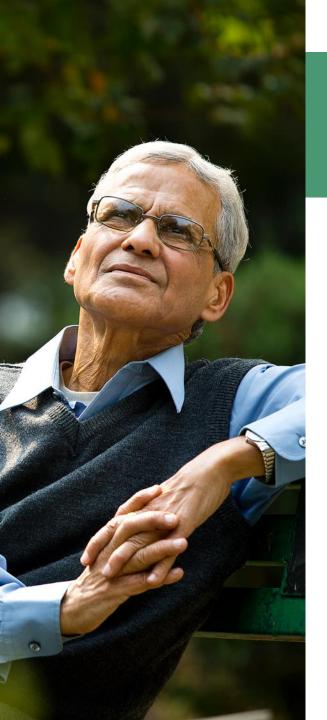

New services for older adults

- One2One Telephone Reassurance
- CARES Flex
- Home Modifications
- Empowerline Self Service

18,893

people received counseling from certified professionals

56,270

replies to requests for assistance

Live Beyond Expectations Regional Strategic Plan Framework Helping people live longer, healthier lives in the Atlanta region

empowerline

The Goal:

ARC, led by its Aging and Independence Services Group, will implement a strategic framework, designed to identify and address inequities that create disparities in life expectancy.

Live Beyond Expectations 2020-2025 **Progress to Date**

- Launched External Advisory Committee
- Developed Progress Tracker
- Developed County Snapshots
- Mapping clients served compared to communities of low-life expectancy
- Coordination with County-Based Agencies

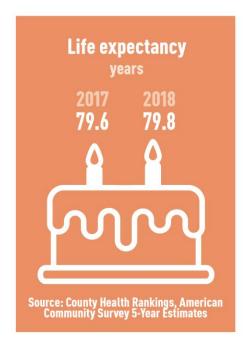

External Advisory Committee Organizational Affiliations

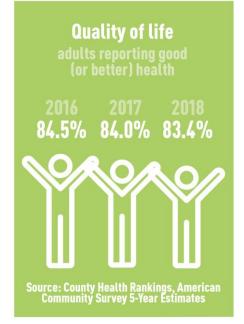

- Community Foundation for Greater Atlanta
- Focused Community
 Strategies
- Georgia Division of Aging Services
- Georgia State University,
 Georgia Health Policy Center
- Grady Memorial Hospital
- Habitat for Humanity Atlanta

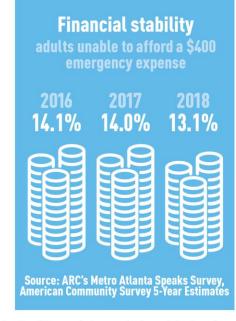

- Jessie Parker Williams Foundation
- MARTA
- Mercy Care
- Park Pride
- Partnership for Southern Equity
- Wellstar Health System
- Wholesome Wave Georgia

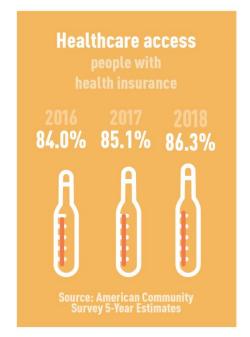

Tracking Factors that Affect Life Expectancy for Metro Atlanta Residents

^{*}Years of Potential Life Lost (YPLL) before the age of 75 is a measure of premature death. The measure simply takes the difference between actual age of death and age 75. For example: If a person dies at age 65, that is 10 Years of Potential Life Lost. To account for population size at different geographic scales, we use the YPLL rate, which is the average sum of the Years of Potential Life Lost for 100,000 individuals.

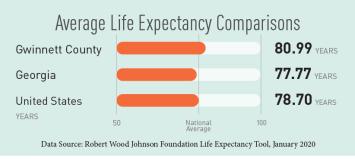

Life Expectancy in **Gwinnett County**

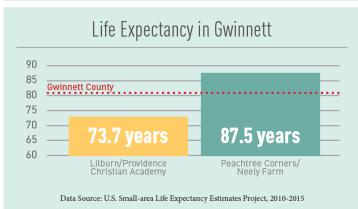

July 2021

Across metro Atlanta, lifespans vary by as much as two decades or more based on geography. Life expectancy is shaped by numerous complex factors beyond an individual's control, such as access to food, sidewalks, and quality education. Many of these factors can be influenced by our work at ARC and that of our partners.

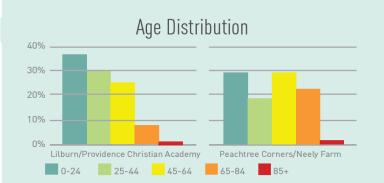

This document provides a snapshot of select social and economic characteristics that vary between the census tracts with the lowest and highest life expectancy Gwinnett County: Lilburn/Providence Christian Academy and Peachtree Corners/Neely Farm, respectively. Consideration of these factors can inform strategies that help to extend lifespans and improve quality of life.

Two neighborhoods 6 miles apart where the average resident has a life expectancy difference of almost 14 years.

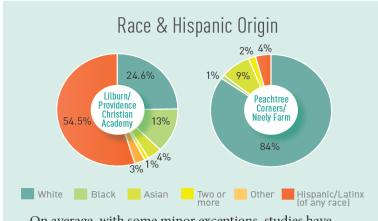

Factors Affecting Life Expectancy in Gwinnett County

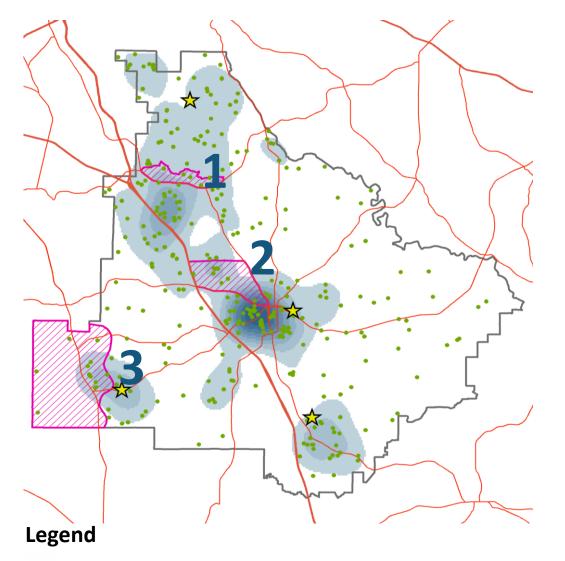

Two-thirds of residents of the Lilburn-Providence Christian Academy tract are under 45, while about half of residents of Peachtree Corners/Neely Farm are 45 or older. The metro Atlanta region as a whole is more evenly distributed.

Data Source: US Census Bureau's American Community Survey (ACS) 5-Year Estimates, 2015-2019

On average, with some minor exceptions, studies have shown that white individuals outlive other individuals at every age and level of education. Reasons for this discrepancy vary by individual, but in general, multiple factors are at play associated with systemic racism, including socioeconomic status and access to health care.
