Treasurer's Report

ARC Board Treasurer Bob Reeves presented the December Treasurer's report. The estimated fund balance as of Dec. 31, 2020 was \$5,472,373.

Treasurer's report presentation

Area Plan on Aging Update and Additional Funding

The Governance Committee approved an update to the Area Plan on Aging, year two of the four-year 2021-2024 plan. The committee also approved the application for additional funding that may become available, such as federal COVID relief programs.

- Presentation: FY22 Update to the Area Plan on Aging and FY22 Funding Request
- Resolution

Transportation Improvement Program – First Read

The committee approved a first read of a regular update to the regional Transportation Improvement Program, which allocates funding for transportation projects across the region.

Presentation

CSR Update: ARC Strategic Communications Plan, State of Region recap, Annual Partners

Malika Reed Wilkins, Senior Director of the Center for Strategic Relations, presented on several key topics. She provided an update on ongoing efforts to develop an ARC strategic communications plan, which aims to position ARC as the region's most-trusted source for the data, tools, and resources to address the region's challenges. She also provided a recap of the successful 2020 State of the Region breakfast, our first-ever virtual SORB. And she informed the committee of the agency's 2021 Annual Strategic Partners: Georgia Power, Uber, and Delta Air Lines.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Members of the Atlanta Regional Commission Atlanta, Georgia

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Atlanta Regional Commission (the "Commission"), as of and for the year ended December 31, 2019, and the related notes to the financial statements, which collectively comprise the Commission's basic financial statements, and have issued our report thereon dated June 17, 2020.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Commission's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Commission's internal control. Accordingly, we do not express an opinion on the effectiveness of the Commission's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did identify a deficiency in internal control, described in the

accompanying schedule of findings and questioned costs as item 2019-001, that we consider to be a material weakness.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Commission's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grants agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Atlanta Regional Commission's Response to Findings

Richals, Cauley + associates, LLC

Atlanta Regional Commission's response to the finding identified in our audit is described in the accompanying schedule of findings and questioned costs. Atlanta Regional Commission's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

To the Members of the Atlanta Regional Commission Atlanta, Georgia

Report on Compliance for Each Major Federal Program

We have audited the Atlanta Regional Commission's (the "Commission") compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of the Commission's major federal programs for the year ended December 31, 2019. The Commission's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the requirements of federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the Commission's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* ("Uniform Guidance"). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Commission's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the Commission's compliance.

Opinion on Each Major Federal Program

In our opinion, the Commission complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended December 31, 2019.

Other Matters

The results of our auditing procedures disclosed instances of noncompliance which are required to be reported in accordance with the Uniform Guidance and which are described in the accompanying schedule of findings and questioned costs as items 2019-002 and 2019-003. Our opinion on each major federal program is not modified with respect to this matter.

The Commission's response to the noncompliance finding identified in our audit is described in the accompanying schedule of findings and questioned costs. The Commission's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control over Compliance

Management of the Commission is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Commission's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Commission's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be material weaknesses and significant deficiencies.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the deficiencies in internal control over compliance described in the

accompanying schedule of findings and questioned costs as items 2019-002 and 2019-003 to be material weaknesses.

A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiency in internal control over compliance described in the accompanying schedule of findings and questioned costs as item 2019-004 to be a significant deficiency.

The Commission's response to the internal control over compliance findings identified in our audit are described in the accompanying schedule of findings and questioned costs. The Commission's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS REQUIRED BY THE UNIFORM GUIDANCE

To the Members of the Atlanta Regional Commission Atlanta, Georgia

Aichals, Cauley + associates, LLC

We have audited the financial statements of the governmental activities, business-type activities, each major fund, and the aggregate remaining fund information of the Atlanta Regional Commission (the "Commission"), as of and for the year ended December 31, 2019, and the related notes to the financial statements, which collectively comprise the Commission's basic financial statements. We issued our report thereon dated June 17, 2020, which contained unmodified opinions on those financial statements. Our audit was performed for the purpose of forming opinions on the financial statements that collectively comprise the basic financial statements. The accompanying schedule of expenditures of federal awards is presented for the purposes of additional analysis as required by Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards ("Uniform Guidance") and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Section II - Financial Statement Findings

2019-001 (Material Weakness)

Criteria: Appendix VII to Title 2 U.S. Code of Federal Regulations (CFR) Part 200 states, "Fixed rate means an indirect cost rate which has the same characteristics as a predetermined rate, except that the difference between the estimated costs and the actual, allowable costs of the period covered by the rate is carried forward as an adjustment to the rate computation of a subsequent period."

Condition: The Commission has a cumulative net indirect over-recovery of \$3,566,553 at December 31, 2019, an increase of \$537,008 from the previous year.

Cause: The indirect cost allocation rate used did not approximate the actual rate incurred considering the prior year over recovery.

Effect: Indirect costs were charged to programs that significantly exceeded actual costs incurred during the fiscal year.

Auditor's Recommendation: The Commission should review policies relating to the allocation of indirect costs to ensure adjustments for the prior year over/(under)-recovery are applied when calculating the indirect cost allocation rate. The Commission should review policies to ensure allocation of costs align with actual costs to minimize over or under recoveries. The Commission should also consider consulting with the grantors to determine an appropriate period to correct the over-recovery.

Views of Responsible Officials and Planned Corrective Actions: The Commission agrees with the recommendation. The Commission adjusted the cost allocation rates in 2019 and again in 2020 to incorporate a reduction of the over recovery. The Commission will continue to monitor the allocation plan and take actions to reduce the over recovery in a timely manner.

Section III - Federal Award Findings

2019-002 (Material Weakness)

U.S. Department of Transportation

Highway Planning and Construction Cluster – CFDA No. 20.205 Passed through Georgia Department of Transportation

Criteria: Direct recipients of Federal awards and their subrecipients must follow the procurement procedures standards of Title 2 U.S. Code of Federal Regulations (CFR) Part 200 sections 200.318 through 200.326, as applicable.

Condition: The Commission is required to follow procurement procedures that conform to applicable Federal law and regulations and standards which include rationale for method of procurement, selection of contractor type, contractor selection or rejection, basis for contractor price, and limiting competition in cases where competition is limited.

Cause: The Commission did not have adequate controls in place to ensure procurement rationale was documented.

Effect: For two of the vendors tested, documentation supporting sole source rationale could not be located.

Questioned Costs: CFDA No. 20.205: \$75,126

Identification as a Repeat Finding: A similar finding was reported in the prior year's audit as finding number 2018-003.

Auditor's Recommendation: The Commission should follow procurement procedures that conform to applicable Federal law and regulations and standards.

Views of Responsible Officials and Planned Corrective Actions: The Commission agrees with the recommendation. The Commission will review procurement procedures to ensure purchases conform to applicable Federal laws and regulations and standards.

2019-003 (Material Weakness)

U.S. Department of Transportation

Highway Planning and Construction Cluster – CFDA No. 20.205 Passed through Georgia Department of Transportation

U.S. Department of Health and Human Services

Aging Cluster – CFDA No. 93.044, 93.045, 93.053 Passed through Georgia Dept. of Human Services Medicaid Cluster – CFDA No. 93.778 Passed through Georgia Dept. of Community Health

Department of Homeland Security

Homeland Security Grant Program – CFDA No. 97.067 Passed through Georgia Emergency Management Agency

Criteria: Appendix VII to Title 2 U.S. Code of Federal Regulations (CFR) Part 200 states, "Fixed rate means an indirect cost rate which has the same characteristics as a predetermined rate, except that the difference between the estimated costs and the actual, allowable costs of the period covered by the rate is carried forward as an adjustment to the rate computation of a subsequent period."

Condition: The Commission has a cumulative net indirect over-recovery of \$3,566,553 at December 31, 2019, an increase of \$537,008 from the previous year.

Cause: The indirect cost allocation rate used did not approximate the actual rate incurred considering the prior year over recovery.

Effect: Indirect costs were charged to programs that significantly exceeded actual costs incurred during the fiscal year. This finding could potentially affect all federal programs administered by the Commission.

Auditor's Recommendation: The Commission should review policies relating to the allocation of indirect costs to ensure adjustments for the prior year over/(under)-recovery are applied when calculating the indirect cost allocation rate. The Commission should review policies to ensure allocation of costs align with actual costs to minimize over or under recoveries. The Commission should also consider consulting with the grantors to determine an appropriate period to correct the over-recovery.

Views of Responsible Officials and Planned Corrective Actions: The Commission agrees with the recommendation. The Commission adjusted the cost allocation rates in 2019 and again in 2020 to incorporate a reduction of the over recovery. The Commission will continue to monitor the allocation plan and take actions to reduce the over recovery in a timely manner.

2019-004 (Significant Deficiency)

U.S. Department of Transportation

Highway Planning and Construction Cluster – CFDA No. 20.205 Passed through Georgia Department of Transportation

Criteria: Grant requirements state non-federal entities are restricted from contracting with or making sub-awards to parties that are suspended or debarred.

Condition: The Commission is required to verify vendors are not suspended, debarred or otherwise excluded from or ineligible for participation in Federal assistance programs or activities. The contract documentation for five vendors selected for testing did not include documentation that the vendor selected was not suspended or debarred.

Cause: The Commission did not have adequate controls in place to ensure contracts were not being awarded to a suspended or debarred party.

Effects: Based on our search of the federally operated System for Award Management (SAM) website, this oversight did not cause the Commission to contract with a suspended or debarred party.

Identification as a Repeat Finding: A similar finding was reported in the prior year's audit as finding number 2018-005.

Recommendation: The Commission should review federally funded contracts to ensure file documentation includes verification that the vendor selected was not suspended or debarred.

Views of Responsible Officials and Planned Corrective Actions: The Commission agrees with the recommendation. Documentation will be retained to support the search of the debarment and suspension listing.

Atlanta Regional Commission Notes to Schedule of Expenditures of Federal Awards For the Year Ended December 31, 2019

1. Basis of Presentation

The accompanying schedule of expenditures of federal awards (the "Schedule") includes the federal award activity of the Atlanta Regional Commission (the "Commission") under programs of the federal government for the year ended December 31, 2019. Because the Schedule presents only a selected portion of the operations of the Commission, it is not intended to and does not present the financial position, changes in financial position, or cash flows of the Commission.

The Schedule is presented using the modified accrual basis of accounting, which is described in Note 1C of the Commission's financial statements. Expenditures are recognized following the applicable cost principles contained in either Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards ("Uniform Guidance") or the OMB Circular A-87, Cost Principles for State, Local, and Indian Tribal Governments, wherein certain types of expenditures are not allowable or are limited as to reimbursement.

2. Indirect Cost Rates

Agency-wide central support service costs are recorded in the Commission's General fund as indirect costs and are recovered from grantor agencies, through the Commission's special revenue funds and proprietary funds based upon a predetermined indirect cost rate. The Commission's indirect cost plan for 2019 established a fixed rate of 37.0% for direct salaries, wages, and fringe benefits. Departmental indirect costs for the Community Services and Livable Communities departments are recovered from grantor agencies through the cost centers managed by these departments within special revenue funds and proprietary funds based upon a predetermined indirect cost rate for each department. The Commission's indirect cost plan for 2019 established a fixed rate of 8.5% and 11.4% for the Community Services and Livable Communities departments, respectively. The indirect costs rates are applied to the labor base, made up of salaries, wages, and fringe benefits charged directly to the cost centers.

3. Relationship to Federal Financial Reports

Amounts reported in the accompanying Schedule agree with the amounts reported in the related federal financial reports.
