Data Dictionary												
Basic Corridor Information						AADT Type						
Share in a Freight Cluster Area (FCA)						High Ranking Priority						
>90%						Almost all of the project is located in a FCA						
Between 60% and 90%						The majority of a project is located in a FCA						
Less than 60%						The majority of a project is located outside of a FCA						
Project Type Definition						High Ranking Priority						
1						Hard infrastructure (new connection, widening, adding lanes, capacity increase, etc.)						
2						ITS (e.g. supplemental signals at intersections along key truck corridors, connected vehicle technology along key truck corridors, etc.)						
3						Intersection, operation/safety projects (e.g., a truck roundabout)						
4						Multimodal corridor improvements (including misc. improvements, pedestrian/multimodal upgrades, repaving, etc.)						
9						No projects						
10						Aspiration projects (defined in RTP)						
Recommended CUFC in Source Plan Type						Medium Ranking Priority						
Yes												
No or not applicable												
Source Plan Priority Type						Medium Ranking Priority						
High						Tier 1 or short-term						
Low or NA						Tier 2 or medium/long term or not applicable						

Connectivity Type	Low Ranking Priority
High	Closely connected to an interstate, to PHFN, to a multimodal freight facility, or to an airport (distance <=0.1 mi)
Medium	Close proximity (>0.1 and <0.5 miles) to any of the above facilities
Low	All other corridors
Funding Type	Low Ranking Priority
Partially	Partially funded
No	Not funded or unknown
