Detailed Description and Justification

The project proposes to reconfigure local-bound traffic distribution into Midtown Atlanta and The Georgia Tech campus by eliminating an exit in both the north and southbound direction and redistributing the local traffic through a system of new frontage roads and local streets. It also includes a continuous approximately 3,940 ft. bridge structure, or cap which would cover and enclose the Downtown Connector. This cap structure will include public open space, park facilities, multiple pedestrian/bicycle transportation connections, and reconnect three cross-streets that were eliminated decades ago during construction of the Downtown Connector on top of the cap structure.

This project is partially funded by a \$3,200,000 FY 2023 Congressionally Directed Spending grant.

Detailed Description and Justification

This project intends to improve the safety and operation of Cobb Parkway (SR3/US41) at a relocated and improved intersection with Black Acre Trail and Third Army Road. The existing Black Acre Trail intersection with Cobb Parkway (SR3/US41) across from Third Army Road is misaligned and has poor vertical and horizontal site distance deficiencies, creating safety and operational issues. This project is partially funded by a \$2,000,000 earmark (FY 2023 Congressionally Directed Spending).

Detailed Description and Justification

The project consists of operational and safety improvements to improve site distance issues, congestion delay and turning movements at the intersection of Johnson Ferry Road and Shallowford Road. The intersection is an identified congestion bottleneck in the Cobb County Comprehensive Transportation Plan and a key connection through eastern Cobb County between Marietta and North Fulton area. This project is partially funded by a \$5,000,000 earmark (FY 2023 Congressionally Directed Spending)

Detailed Description and Justification

This project will develop a new multimodal transit center facility serving the South Cobb area, providing opportunities for CobbLinc riders to transfer between routes and/or transportation modes, and to access the surrounding jobs, medical and community services in the area. A current site selection and feasibility study is underway that will determine the site-specific location for the facility. This project is partially funded by a \$1,600,000 earmark (FY 2023 FTA Community Project Funding).

Detailed Description and Justification

Funds will be used to conduct a scoping and feasibility study of a multi-use path connecting economically disadvantaged residents to jobs, health care, education, and other civic life. Georgia DOT owns the right-of-way underneath GA 400 and is providing a 20-foot easement to the City of Roswell to build a multiuse path. The project will unite the Liberty Square Neighborhood (a Historically Disadvantaged Community and Area of Persistent Poverty), Roswell’s town center, the City of Alpharetta, and the greater Metro Atlanta through the Big Creek Greenway. The State of Georgia began constructing GA 400 in 1954 and culminated in the completion of eight lanes in 1989. The highway cut off the Liberty Square Neighborhood from the greater Roswell community. Since that time, residents of Roswell have been unable to cross the highway. Roswell residents consider this connection critical and rated it as a high priority. The multi-use path would be a recreational facility that also provides Liberty Square residents access to a recreational park.

This project is partially funded by a \$2,000,000 US DOT Reconnecting Communities Program grant.

Detailed Description and Justification

This project provides enhancements to Gwinnett County Transit Route 25, which is scheduled to begin in 2023. The construction of modern bus shelters along the route will provide safe, protective waiting areas for riders along the route.

This project is partially funded by a Congressional/FTA Community Project Funding grant.

Detailed Description and Justification

The Buford- Suwanee Microtransit is a planned transit expansion to provide on-demand transit service in northern Gwinnett County, encompassing the cities of Suwanee, Sugar Hill, and Buford. This project will allow for the procurement 12 Microtransit vehicles for this proposed new Microtransit zone. This project is partially funded by an FTA administered FY 2023 Community Project Funding earmark.

☒

Detailed Description and Justification

This project transforms MARTA's busiest station to become more customer friendly, easier to navigate and transfer between different modes of transit. By removing the canopy over the center of Five Points Station we open the facility and create a more welcoming public plaza. Re-imaging the space as a bustling transit hub not only improves the customer experience but contributes to the greater aesthetic and unique feel of downtown while also laying the groundwork for potential development focused on transit in the immediate area. The Phase 2 Transformation, subject of the FY22 RAISE discretionary award, features a redesigned entrance, the relocation of bus bays to improve bus-rail transfers, and the creation of public space for programmed and spontaneous events. This project was awarded a US DOT FY 2022 RAISE grant.

Detailed Description and Justification

Safe pedestrian access is crucial to riding transit. Nearly every passenger trip begins or ends with a journey in the roadside to one of MARTA’s 9,000 bus stops - so problems like missing sidewalks or unsafe crossings create real barriers to mobility for metro Atlantans. MARTA’s Safe Routes to Transit project will remove barriers and provide safe access to bus stops through a variety of pedestrian and ADA improvements. These will include a mix of high-visibility crosswalks, signage curb extensions, medians and refuge islands, rectangular rapid-flash and pedestrian hybrid beacons, and installation of sidewalks, curb ramps, and other accessibility features. The project will include a needs assessment to identify locations for improvement, will design site-specific pedestrian and safety infrastructure, and carry out construction. Through this project, MARTA will create safe routes to transit that are equipped with sidewalks, safe crossings, and ADA accessibility features. This project is also an opportunity to better serve historically disadvantaged, minority, and low-income communities who do not always have safe pedestrian infrastructure to access transit and who are not located near transit corridors programmed for Capital Improvements.

This project is partially funded by a Congressional/FTA Community Project Funding grant.
